UNIVERSAL DRILL BITS

Copyright © 2009
Dimar Canada Ltd.

An amazing "all in one" drill designed to satisfy a wide array of drilling applications as noted below. A unique 4-flute carbide tipped and titanium coated cutting head, will last longer even on tough and abrasive surfaces.

A sharp and non skid drilling tip design will provide an accurate drilling entry in 'hard to reach' applications such as bathroom tiles and wall mirrors.

For optimum results, hold the drill at 90° to the material and apply steady light pressure during drilling. Please refer to the water droplet below, and apply water when drilling in certain materials. The drill may be resharpened for an extended life.
